CANABLES® RECYCLING RECEPTACLES

Canables® offer a complete line of eye-catching containers with flexibility to meet many requirements for collecting recyclables in public places. Canables® recycling receptacles look sharp, and with custom, four-color artwork, can look most any way you want. Awareness and visibility are keys to a successful program. People will use recycling containers placed in public if they notice them!

Consider Canables® for locations such as:

- break rooms, copy centers, lounges
- schoolyards, classrooms, playgrounds
- transit stations, courtyards, vending pavilions
- parkways, river walks, ball fields
- street festivals, concerts, fairgrounds

If your needs require the durability and fire-resistance of steel, Original Canables® will meet your needs. Steel is much stronger than most molded plastic containers and more easily recycled too. And because they're made of steel, recycled content is a minimum 30%.

Looking for a unique way to show off your recycling program by showing people the recyclables inside? Clear Canables® are the choice. These unique containers also provide a collection solution where security issues are a concern.

Graphic Canables® offer a cylindrical palette on which to release your creative energies. Children, art students and professional designers will welcome this opportunity to practice their craft.

Canables® are available in 15, 20, 30 and 55 gallon sizes. *

CLEAR CANABLES® are collapsible for convenient storage, made of 100% recycled PET plastic, with interchangeable tops and bottoms of metal or plastic

Patent Pending

*Not all sizes are stock items; contact us for details. Canables® dimensions are based upon industry standards so, parts we supply for Canables®, such as lids and liners, will also fit steel drums of the same size.

ORIGINAL CANABLES®

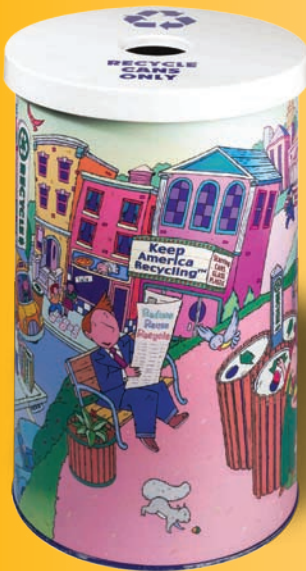

Made of rugged, heavy gauge galvanized steel and powder coated with a durable finish of green or blue (custom colors available too). Original Canables® include the bold Recycle•Recycle•Recycle graphic pictured here. We can also provide blank Canables® to accommodate custom labeling.

CLUSTERS®

Windsor Barrel Works created the original Clusters® recycling receptacles, made of 100% post-consumer recycled plastic lumber. Call us if products like these also meet your needs.

US Patents D331,824; D 343,038; 5,503,287; 5,624,050; 6,505,751 B1; 6,311,859 B1. Other patents pending.

GRAPHIC CANABLES®

Promote your recycling program with Graphic Canables® full-color 360° images applied to galvanized steel containers. Perfect for student poster contests and community artwork. Use your own designs or ours.

CLEAR CANABLES®

Can be disassembled and conveniently stored when not in use. Clear, recycled PET plastic walls show the public how much is being recycled. Available in all-plastic or with metal lids and bases.
