

**Stately "Mainstreet" receptacle  
designed with recycling in mind.**

Windsor Barrel Works "Mainstreet" litter receptacles, made of recycled plastic lumber and cast-aluminum, present an environmentally sensitive alternative to wrought iron models. Easily configured for the collection of recyclables in public, with restricted openings and special graphics.

Two popular Maryland cities,  
one litter receptacle brand.

Annapolis (top picture) installed Windsor Barrel Works' receptacles on its historical State House grounds. Ocean city uses large, 65 gallon capacity containers for litter collection on its busy seaside boardwalk.

Windsor Barrel Works and Kettle Creek Designs are divisions of the Kettle Creek Corporation.
